

# IRAQ: Early Warning Alert and Response Network (EWARN) Snapshot № 17

## Displacement Crisis in Iraq (week 36 to 37, 2015)

### HIGHLIGHTS

Seventy-eight (78) reporting sites (including forty five Internally Displaced People's (IDP) camps, nine refugee camps and fifteen mobile clinics) submitted timely and complete weekly reports.

The total number of consultations reported during week 37 was 25,497 (12,722 male and 12,775 female) compared to 23,755 (10,347 male and 13,408 female) from the previous reporting week, 36.

Leading causes of morbidity in the camps included Acute Respiratory Tract Infections (ARI) (16,801), Acute Diarrhea (AD) (2,616) and skin diseases (2,366) during the recent 2 weeks.

Twenty one (21) alerts were generated, of which seventeen were from IDP camps, four from refugee camps and one from a hospital.

Eleven of these alerts were verified as true and were further investigated, appropriate response was conducted by the Governorates Departments of Health, WHO and the relevant health cluster partners while the remaining eleven alerts did not follow the case definition thresholds.
